

Petrotranz announces Pandell as Silver TAP Partner

Transforming how energy information is exchanged

CALGARY, AB, Canada (August 17th, 2015) – Petrotranz Inc. is pleased to announce that Pandell is the second Production Accounting System Vendor Partner, to be recognized for their integration efforts with the Petrotranz Data Exchange (“PDX”).

Petrotranz has been working very closely with Pandell for several years. Pandell’s PANexus system has been deployed to Producer Operators across Western Canada. Based on feedback sessions from our mutual customers, Pandell enhanced the PANexus system for Crude Shipper and WIO Splits integration with the Petrotranz Data Exchange (PDX). PDX is the first transformational system for the energy industry that allows disparate systems to communicate with each other and the first system that provides a common language and secure hub for transacting information between all energy stakeholders.

“Petrotranz is pleased to have one of our closest vendor partners, Pandell, as another member of our growing TAP program,” says Dallas Smith, Vice President of Operations, Petrotranz Inc. “The immediate efficiency gains PDX brings our mutual customers through real-time integration is imperative short and long term for the Energy Industry.”

“As software development providers for Petrotranz, we have been fortunate to share in their continued growth and success over the years, says Cleave Whitaker, Division Manager, Pandell. The TAP partnership provides an essential integration for our client base, between Pandell’s PANexus production accounting software and the Petrotranz Data Exchange.”

All risk associated with data re-entry for crude oil shipper and working interest owner splits is mitigated, improving the accuracy of information and the speed at which information is available to all stakeholders. This functionality has been available to Pandell PANexus customers since early 2015.

About Pandell

Pandell is a software solutions company that delivers industry specialized software products and business services. For oil and gas companies, Pandell offers a suite of back-office software products and outsourced production and financial accounting services.
